Jenkins behavior:

1 - You put a memory bomb in your Jenkinsfile

2 - The Jenkins Master send to the job to an Jenkins agent and it runs the pipeline and the memory bomb. So the Jenkins agent host break down

3 - Jenkins Master detect that the jobs was not finished.
So the send the same job to another Jenkins Agent

Memory BOMB (3 / 5)

Jenkins master

Jenkins behavior:

1 - You put a memory bomb in your Jenkinsfile

2 - The Jenkins Master send to the job to an Jenkins agent and it runs the pipeline and the memory bomb. So the Jenkins agent host break down

3 - Jenkins Master detect that the jobs was not finished. So the send the same job to another Jenkins Agent

4 - Jenkins agent runs memory bomb and... break down

5 - Go to step 2

Jenkins agent 1   Jenkins agent 1   Jenkins agent 1

localhost:8080/job/memory/

Jenkins
