Containers are just a bunch of deltas on a file storage and a lot of genius around. Don't forget that layers can be accessed.

Thousands of exposed docker images leak secrets on the Internet

Do you store secrets in your containers?

Do you store security configurations on your containers?

Do you store intellectual property on your containers?

Where are your containers published?

Keep **SECRETS** safe!

Keep SECRETS safe!

- Do you store secrets in your containers?
- Do you store security configurations on your containers?
- Do you store intellectual property on your containers?
- Where are your containers published?

Thousands of exposed docker images leak secrets on the Internet
